Gallery Planters

As part of our comprehensive outdoor furniture range, Street Design offers you the opportunity to specify from a range of planters constructed from galvanised mild steel with bolt-on infill panels manufactured from either galvanised steel or self-coloured, high density polyethylene.

The Gallery planter is a low maintenance product. As standard the galvanised steel and polyethylene side panels have no applied finish and therefore need no repairs or touch-up. An optional polyester powder coated finish can be applied to the galvanised components.

As standard, the Gallery planters will be delivered fully assembled, although they have been designed to enable them to be supplied as a flat-pack planter. This is particularly suited for areas where access is restricted. The components can be carried onto site, for assembly. The assembly involves bolting the side panels to a galvanised mild steel base and top frame, and to galvanised mild steel angle corners.

Flat pack Gallery planter ready for packaging and distribution.

Flat pack Gallery planter consists of 11 parts with fixings.

1250 x 635 x 715mm high in galvanised sheet

1250 x 1250 x 918mm high Gallery planters with black sheet/galvanised mesh panels

1250 x 635 x 715mm high in galvanised sheet/mesh panels with galvanised mesh trellis

1250 x 635 x 715mm high in galvanised sheet/mesh

1250 x 635 x 715mm high

1250 x 635 x 715mm high

635 x 635 x 715mm high

635 x 635 x 715mm high

635 x 635 x 1370mm high

1250 x 1250 x 1370mm high Tree planter

Standard Colours - HDPE (High density polyethylene)

Red Yellow Blue Green Orange Violet Black

Standard Finishes - Pre-galvanised steel sheet

Galvanised steel sheet Galvanised steel Galvanised mesh Black sheet Galvanised mesh

Special Colours - HDPE (High density polyethylene)

Beige Brown White Grey

635 x 635 x 1370mm high

Materials and construction

All furniture products are robustly constructed using only quality, durable materials.

All mild steel fabricated components will be hot dip galvanised after fabrication, to BS EN ISO 1461. All fixings will be bright zinc plated. Planters will be fitted with a geotextile filter fabric lining, which allows the water to drain through the planter while retaining the fill material.

The high density polyethylene is available either 12.5 or 19mm thick. It is UV stable and will not rot, de-laminate, splinter or crack. It is stain and graffiti resistant, moisture and chemical resistant and requires no painting. It is high impact resistant and is recyclable and non-toxic.

The galvanised sheet side panels will be 0.8mm thick and be pre-galvanised.

The steel mesh will be pre-galvanised 50x50mm x 6 gauge welded mesh.

Black and white polyethylene panel with CNC routed logo

Standard sizes (mm)

Plan Size	Heights above ground level		
	715	918	1370
635 x 635	•	•	•
1250 x 635	•	•	•
1250 x 1250	•	•	•

Non-standard sizes - Other sizes can be manufactured on application

Options

Self watering system

All planters can have a self watering system fitted. The system comprises of 300 micron polythene lining to the base of the planter, hydroleca sacks and plastic filler pipe.

Tree anchors

Planters can have galvanised steel tree anchor plates fitted to each corner.

Height adjusters

The planters can be supplied with height adjustable feet to allow for levelling on site and repositioning.

Colour

The mild steel components will be left galvanised as standard. They can be finished with a polyester powder coating, to the colour of your choice. Material samples available on request.

Standard colours - HDPE (high density polyethylene)

- Red, yellow, blue, green, orange, violet and black.

Special colours - HDPE (high density polyethylene)

- Beige, brown, white and grey.

Standard colours - Pre-galvanised steel sheet

- Galvanised sheet only.
- Galvanised sheet with galvanised mesh.
- Black powder-coated sheet steel with galvanised mesh.

Non-standard colours

- Galvanised components can be polyester powder-coated to any RAL colour depending on quantity and availability.
- The polyethylene panels are available in a limited number of other colours. Details on request.

Personalisation

- All planters can be personalised with the addition of names, logos and crests.

This range is only a small part of a wide range of planters and external street furniture products that Street Design can manufacture and supply. Standard products are available to view on our website or we can undertake bespoke designs to suit your specific project requirements.
