Street Design

Roof Gardens

As part of our comprehensive outdoor furniture range, Street Design offers you the opportunity to specify from a range of planters and seating products, specifically for the creation of roof gardens.

The furniture can be manufactured using either Iroko hardwood or a treated softwood. As standard, the hardwood and softwood will be supplied with a natural finish. This helps reduce the on-going maintenance costs. If required, the timber can be supplied with a 3 coat wood stain finish, to the colour of your choice.

In principal, any Street Design planter can be specified for use in roof gardens. The most suitable to create straight sided planters, would be the Grenadier design. The Diplomat planter is most suited for the creation of curved or shaped planting areas.

The Gallery planter has been designed as a flat-pack planter. This is particularly suited for areas where access is restricted.

The components can be taken up onto the roof for assembly on site. The Gallery planter has a galvanised mild steel frame with bolt-on infill panels manufactured from, self-coloured, high density polyethylene.

Diplomat planters, in natural treated FSC softwood with matching tables and benches, on an office roof scheme in central London.

Materials and construction

All furniture products are robustly constructed using only quality, durable materials. Hardwood products are constructed from Iroko hardwood. Softwood products are constructed using Scandinavian redwood that is treated for a desired service life of 30 years minimum.

All mild steel fabricated components will be hot dip galvanised after fabrication to BSEN ISO 1461. All fixings will be bright zinc plated. Planters will be fitted with a geotextile filter fabric lining, which allows the water to drain through the planter while retaining the fill material.

Timber policy

All treated softwood products are manufactured using materials obtained from growers who operate under the Forest Stewardship Council (FSC). Iroko hardwood is from sustainable source. Other FSC hardwoods available upon request. The timber species will vary depending on availability of the material and sections at the time.

Flat pack Gallery planter ready for packaging and distribution.

1250 x 635 x 715mm high

Options

Colour

All timber containers are available either left natural or the timbers can be treated with 3 coats of wood stain, to the colour of your choice. Contrasting colour bands are available on timber planters.

Material samples available on request.

Seating

All timber planters are available with slatted bench seating bolted to galvanised steel bracket supports bolted to the planter. Bench slats can be 95mm or 70mm wide and are coated with 3 coats of wood stain. Support brackets can be supplied galvanised only or with an optional polyester powder coated finish, to the colour of your choice.

Self watering system

All planters can have a self watering system fitted. The system comprises of a 300 micron polythene lining to the base of the planter, hydroleca sacks and plastic filler pipe.

Tree anchors

All timber planters can have galvanised steel tree anchor plates fitted to each corner.

Height adjusters

All timber and metal containers can be supplied with extended corner posts for site scribing and cutting on site allowing the top of the container to sit horizontally. If the containers are likely to be relocated then an alternative height adjustment can be offered. Adjustable foot height mechanisms can be fitted allowing adjustment to relocated levels.

Skirting.

All timber planters can be supplied with loose, 22mm thick skirting boards for scribing, cutting and fitting on site.

Personalisation.

All planters can be personalised with the addition of names, logos and crests.

Pergolas and trellis.

All planters can be supplied with extended posts to accept pergolas and trellis screen panels.

This range is only a small part of a wide range of planters and external street furniture products that Street Design can manufacture and supply. Standard products are available to view on our website or we can undertake bespoke designs to suit your specific project requirements.
