

# STOCKPORT planter

## MATERIAL FINISHES

### Standard finish

#### FSC treated redwood standard finish

As standard, all FSC treated redwood planters will be supplied with a natural finish. The preservative treatment process will colour the timber a light brown/green.

*FSC treated redwood with a natural finish*

#### Aged natural treated redwood

Left to weather naturally, the timber will eventually turn a silver grey colour.

#### FSC iroko hardwood standard finish

As standard, all FSC iroko hardwood planters will be supplied with a natural finish. Due to the nature of the material and the density of the grain, iroko hardwood is not capable of taking a preservative treatment. Iroko hardwood is a naturally durable material, giving a life expectancy in excess of a treated softwood.

*FSC iroko hardwood with a natural finish*

#### Aged natural iroko hardwood

Left to weather naturally, the timber will eventually turn a silver grey colour.

#### Mild steel standard finish

After fabrication, the 60.3mm diameter top and bottom rails will be hot dip galvanised. The galvanised rails will require no further maintenance.

#### Stainless steel standard finish

After fabrication, the 60.3mm diameter top and bottom rails will be dull polished. The stainless steel rails will require no further maintenance.

### Optional finish at extra cost

#### FSC treated redwood wood optional finish

As an optional extra, the FSC treated redwood can be supplied with a stained finish. This will be applied after the timber treatment process. The standard stain will be 3 coats of Ronseal quick drying water based stain. The standard colour will be teak. Other stains and colours can be applied upon request. As part of the future maintenance, all stained products will require additional staining. The frequency of re-staining will depend on the location, use and the effects of weathering and traffic film.

The products should be cleaned down, very lightly sanded and re-coated with the original stain.

#### Mild steel optional finish

After fabrication and hot dip galvanising, the 60.3mm diameter top rail can be polyester powder coated.

They can be powder coated to any RAL colour depending on product quantity and stock levels of powder colours.

Depending on stock levels the powders are available in 3 gloss levels; gloss, satin and matt.

*60.3mm diameter top rail, polyester powder coated RAL 9006 with a satin gloss level*
